SUMMARY

Software Engineer experienced in building enterprise applications with Java and .NET on top of relational databases. Comfortable across the stack with React/Next.js and Node.js, and proficient with CI/CD, Git, Docker, and Linux servers. Skilled at refactoring legacy code, improving reliability, and shipping maintainable features for corporate environments.

EXPERIENCE

SOFTWARE DEVELOPER / PT ASTRA HONDA MOTOR

February 2024 – Present

- Develop and maintain enterprise applications in Java and .NET based on business requirements and technical specs.
- Refactor and migrate legacy modules to modern frameworks to improve performance, stability, and usability.
- Troubleshoot production issues, analyze SQL queries, and deliver fixes with regression tests.
- Collaborate with analysts and QA to ship features end-to-end, from design to deployment via CI/CD pipelines.

Tech: Java (Spring), Oracle, SQL, Git, HTML, CSS, JavaScript, Red Hat 3scale API Management

FREELANCE FULL STACK DEVELOPER / RAZNAR DIGITAL NUSANTARA

March 2023 – Present

- Built Tongkrongan Digital (voucher-game sales website) with secure payment-gateway integration and order tracking.
- Built a Virtual Machine management client & admin panel covering: VM provisioning (create/destroy), power controls (start/stop/reboot), OS install from image, boot-mode switching, network setup (DHCP/static IPv4), and password reset; equipped with status monitoring, job queue with retries, and audit logs.

Tech: React.JS, MySQL, Git, Next.JS, Docker, Dokploy

FREELANCE FULL STACK DEVELOPER / RK ACCURATE CONSULTANT

November 2023 – December 2023

- Built a web dashboard to manage an API bridge integrating Accurate Online with client ERP systems.
- Implemented authentication, job monitoring, retry mechanisms, and audit logs to ensure reliable data sync.
- Prepared delivery documentation and deployment guides for smooth handover and maintenance.

Tech: Laravel, MySQL, Linux, Git

INTERNSHIP WEB DEVELOPER / AMAL ISLAMI FOUNDATION

August 2022 – February 2023

- Built and launched the organization website from scratch, aligned with content and branding needs.
- Modeled content types (foundation profile, school profiles, news/events) and reusable components; implemented responsive layout.
- Implemented editor-friendly flows (create/update/publish) and role/permission guards

Tech: Adonis.Js, PostgreSQL, Git, HTML, CSS, JavaScript

FULL STACK DEVELOPER / CELINA

February 2021 – March 2021

- Developed REST APIs using Laravel to support mobile features (chat and tele-consultation).
- Integrated the Laravel back end with a React Native client; ensured data consistency and idempotent requests for unstable networks.
- Prepared API documentation (Postman collections) and staging seed data to accelerate QA and iteration.

Tech: Laravel, React.JS, React Native, MySQL, Git

FRONT END DEVELOPER / INTRACTION

January 2021 – February 2021

- Implemented responsive UI for a webinar application inspired by Mentimeter and Zoom interactions with ReactJS.

Tech: React JS, Git

EDUCATION

UNIVERSITAS KOMPUTER INDONESIA – INFORMATICS ENGINEERING

September 2019 – Sep 2023 / GPA 3.46

SMAN 58 JAKARTA TIMUR – NATURAL SCIENCE

2016 - 2019

CORE SKILLS

- Languages: Java, C# (.NET), TypeScript, JavaScript, PHP, Python, SQL
 - Back-End: Spring Boot, .NET, Express.js, AdonisJS, Laravel, REST API
 - Front-End: React, Next.js, React Native, HTML, CSS, Tailwind CSS
 - Databases: Oracle, MySQL, PostgreSQL, MongoDB
 - DevOps: Git, CI/CD (GitHub Actions, CircleCI, Buddy), Docker, Linux, Nginx
 - Practices: Unit Testing, Code Review, Agile/Scrum, Troubleshooting
-

CERTIFICATE

- CentOS Web Server & DevOps - Sanbercode
 - DevOps Learn CI/CD Process for Professionals & Teams - Udemy
 - Database Design & Programming with SQL – Oracle Academy – DTS Kominfo
 - Junior Web Programmer – Badan Nasional Sertifikasi Profesi (BNSP)
 - Golang Backend Development - Sanbercode
-

LANGUAGE

- Bahasa Indonesia
- English
